Why a Scientific Format? The scientific format may seem confusing for the beginning science writer due to its rigid structure which is so different from writing in the humanities. One reason for using this format is that it is a means of efficiently communicating scientific findings to the broad community of scientists in a uniform manner.

Genes and human diseases Introduction. The human body is made up of millions of cells each specialising in a particular function like the sensing light and smell or even the absorption of oxygen into the blood.

### **WHO | Genes and human diseases**

Since the Bible describes all human beings as sinners, and we are all related ("And He has made from one blood every nation of men to dwell on all the face of the earth," Acts 17:26), the gospel makes sense only on the basis that all humans alive and all that have ever lived (except for the first woman<sup>6</sup>) are descendants of the first man Adam. If this were not so, then the gospel could not ...

Epigenetics is the study of heritable phenotype changes that do not involve alterations in the DNA sequence. The Greek prefix epi-(ἐπι-"over, outside of, around") in epigenetics implies features that are "on top of" or "in addition to" the traditional genetic basis for inheritance. Epigenetics most often denotes changes that affect gene activity and expression, but can also be used to ...
