In this problem, you are asked to relate motion (the acceleration of the two blocks) to force (tension in the rope, friction). Force and motion of a single object are always related through Newton's Second Law, so this is a force or 2nd Law problem.. In addition, note that you must treat the blocks as separate systems. You are asked to find the tension in the rope between them, and cannot ...

Gravity is such a pesky thing. It prevents us from doing all sorts of wonderful things. Such as floating through the air like a balloon, traveling into orbit without paying an ugly cost in ΔV , and being morbidly obese but still light on your feet like Baron Vladimir Harkonnen. By the same token, it would also be incredibly useful to be able to create gravity on command.

Do you know the difference between passive range of motion and active range of motion? And do you know why it's vital that you have both in adequate quantities if you want to be mobile, injury-resistant, and strong?. Most people don't know that there is more than one kind of range of motion (ROM), so don't worry if that's you...

Cracking joints (also called joint cavitations) often feels good because it can release tension and increase the range of motion. Cracking or releasing the spinal joints of your back is usually safe if done in a controlled manner and within the normal planes of motion of the spine. Rotation and extension of the spine are the movements that usually create the cracking sounds of the small spinal ...
