This species is not migratory but may move seasonally following migrating ungulates within its territory. Gray Wolves also disperse widely. Males in northwestern Montana can move an average of 113 km (70 miles) from their natal territory, and females 77 km (48 miles), before establishing a new territory or joining an existing pack (Boyd and Pletscher 1999).

We are committed to an understanding of the wolf, its natural history, its varied relation to humans throughout the ages, and its role as a major symbol in folklore, myth, legend, art and religion, through education, science and public awareness.

What is a Wolf Personality Like? | Wolf Song of Alaska

The strength of inference regarding the presence or magnitude of risk effects is contingent upon the focal measure of predation risk and its mechanistic association with the response of prey (Ford and Goheen, 2015). Moll et al. (2017) classified measures of predation risk into three broad categories: risky places, risky times, and habitat characteristics.

Designing studies of predation risk for improved inference ...

Charles Darwin: Delivering the Evolutionary Gospel. Charles Darwin would not have been anyone's first guess for a revolutionary scientist. As a young man, his main interests were collecting beetles and studying geology in the countryside, occasionally skipping out on his classes at the University of Edinburgh Medical School to do so.
