Choose the correct vertebrate group for each description, match the animal with its vertebrate classification, and three short-answer questions.

Science: Animal Worksheets - Super Teacher Worksheets

To begin, I ask students to think back to our Classifying Living Things lesson, where they grouped organisms in a variety of ways. I explain that today, they are classifying specific kinds of animals. Vocabulary Preview. I direct students' attention to the words vertebrate and invertebrate written on the board and ask: What do you think these words mean?

The embryology of trilobites is unknown, but after hatching and development of a hard exoskeleton (which presumably occurred at or soon after hatching) they molted their exoskeletons as they grew, as all arthropods today, leaving a record of their developmental stages. Thus, the ontogeny (patterns of growth and development) of trilobites is known only as far as calcite exoskeletons of immature ...

C.W. Roberts, in International Encyclopedia of the Social & Behavioral Sciences, 2001 Content analysis is a class of techniques for mapping symbolic data into a data matrix suitable for statistical analysis. When the term is used, one refers to the content analysis of cultural artifacts (e.g., books, architectural styles, discourse on prime-time television, etc.).

Content Analysis - an overview | ScienceDirect Topics

Biodiversity is not evenly distributed, rather it varies greatly across the globe as well as within regions. Among other factors, the diversity of all living things depends on temperature, precipitation, altitude, soils, geography and the presence of other species. The study of the spatial distribution of organisms, species and ecosystems, is the science of biogeography.
