Industrial arts is an educational program which features fabrication of objects in wood or metal using a variety of hand, power, or machine tools. It may include small engine repair and automobile maintenance, and all programs usually cover technical drawing as part of the curricula. As an educational term, industrial arts dates from 1904 when Charles R. Richards of Teachers College, Columbia ...

Roll slitting is a shearing operation that cuts a large roll of material into narrower rolls. There are two types of slitting: log slitting and rewind slitting. In log slitting the roll of material is treated as a whole (the 'log') and one or more slices are taken from it without an unrolling/re-reeling process.
