The Rorschach test is a psychological test in which subjects' perceptions of inkblots are recorded and then analyzed using psychological interpretation, complex algorithms, or both. Some psychologists use this test to examine a person's personality characteristics and emotional functioning. It has been employed to detect underlying thought disorder, especially in cases where patients are ...

Why would you hide things and still want them to be read? Sounds like a contradiction in terms to me. Regarding the tabs example, instead, why don't you make sure the tabs are keyboard-accessible (so don't just add a click handler, use/make focusable elements for the tabs, and add keyboard handlers for it, and check that your tab order is sensible).

Places it's tempting to use ``display: none;``, but don't ...

Language is the basis of all communication and the primary instrument of thought. Composed of interrelated and rule-governed symbol systems, language is a social and uniquely human means of exploring and communicating meaning.
