Until the 19th century, linear algebra was introduced through systems of linear equations and matrices. In modern mathematics, the presentation through vector spaces is generally preferred, since it is more synthetic, more general (not limited to the finite-dimensional case), and conceptually simpler, although more abstract.. A vector space over a field  $F$  (often the field of the real numbers ...

In mathematics, the dimension theorem for vector spaces states that all bases of a vector space have equally many elements. This number of elements may be finite or infinite (in the latter case, it is a cardinal number), and defines the dimension of the vector space.. Formally, the dimension theorem for vector spaces states that

In matematica, e in particolare in algebra lineare, un sistema di equazioni lineari, anche detto sistema lineare, è un sistema composto da più equazioni lineari che devono essere verificate tutte contemporaneamente. Una soluzione del sistema è un vettore i cui elementi sono le soluzioni delle equazioni che compongono il sistema, ovvero tali che se sostituiti alle incognite rendono le ...

In matematica, e in particolare in algebra lineare, un sottospazio vettoriale è un sottoinsieme di uno spazio vettoriale, avente proprietà tali da farne a sua volta un altro spazio vettoriale. Esempi di sottospazi vettoriali sono le rette ed i piani nello spazio euclideo tridimensionale passanti per l'origine.

Hi. I'm just finishing Chapter 7 tonight (still 2 more problems). I'll start on Chapter 8 tomorrow. The plan is to average 5 problems per day over the course of each month (if you look at the archives on the side you'll see that each month has 150 or 155 entries), which means I'll finish volume 1 on June 23.

**Definición general.** El producto escalar de dos vectores en un espacio vectorial es una forma bilineal, hermítica y definida positiva, por lo que se puede considerar una forma cuadrática definida positiva.. Más específicamente, es una aplicación cuyo dominio es  $V^2$  y su codominio es  $K$ , donde  $V$  es un espacio vectorial y  $K$  el conjunto de los escalares respectivo. [5]
