### **What is the Immune System? (with pictures) - wisegeek.com**

The human immune system is very intriguing as it protects the body from harmful bacteria. One thing that helps keep the system healthy is maintaining a healthy diet. How well do you know the system and the various threats it may be facing? Take up the quiz below and find out.

### **Immune System Practice Quiz 1 - ProProfs Quiz**

The immune system is a complex network of cells, tissues, organs, and the substances they make. It helps the body fight infections and other diseases. White blood cells, or leukocytes, play the main role in immune responses. These cells carry out the many tasks required to protect the body against disease-causing microbes and abnormal cells.

### **Biological Therapies for Cancer - National Cancer Institute**

Sepsis is the body's overwhelming and life-threatening response to infection that can lead to tissue damage, organ failure, and death. In other words, it's your body's overactive and toxic response to an infection.

### **Definition of Sepsis - Sepsis Alliance**

Allergies, also known as allergic diseases, are a number of conditions caused by hypersensitivity of the immune system to typically harmless substances in the environment. These diseases include hay fever, food allergies, atopic dermatitis, allergic asthma, and anaphylaxis. Symptoms may include red eyes, an itchy rash, sneezing, a runny nose, shortness of breath, or swelling.
