An unambiguous definition of "groundwater model" is difficult to give, but there are many common characteristics. A groundwater model may be a scale model or an electric model of a groundwater situation or aquifer. Groundwater models are used to represent the natural groundwater flow in the environment.

Groundwater model - Wikipedia

Humans cannot observe the movement of glaciers since it occurs so slowly. However, a time-lapse video can show how glaciers move downwards, breaking up mountains as they go. Glacial abrasion is ...

FORCES . A force is any push or pull that causes an object to move, stop, or change speed or direction.; The greater the force, the greater the change in motion will be. The more massive an object, the less effect a given force will have on the object.; Unless acted on by a force, objects in motion tend to stay in motion and objects at rest remain at rest.

Science 4-5 - SolPass

For those keen to study a subject that touches on many of the biggest challenges for the world today, environmental science degrees are a good starting point. Environmental science incorporates the study of the physical, chemical and biological processes that take place on the Earth, as well as the social, political and cultural processes which impact the planet.
