In thermodynamics, the exergy of a system is the maximum useful work possible during a process that brings the system into equilibrium with a heat reservoir, reaching maximum entropy. When the surroundings are the reservoir, exergy is the potential of a system to cause a change as it achieves equilibrium with its environment. Exergy is the energy that is available to be used.

Spelling texts, also referred to as spellers, include a variety of teaching methods (e.g., emphasis of certain letters, omission of letters, scrambled letters, deliberate misspellings, etc.) to reinforce the proper spelling of a word. This section applies only to these types of situations, in which the spelling or the formation of the word is the most important consideration.
