This Tech Tip details how to use the free PuTTY SSH client to connect to a Linux system running the OpenSSH server, all while using public key encryption and SSH agent support.

Secure Linux/UNIX access with PuTTY and OpenSSH

This guide shows how to display the date and time in various formats using the Linux command line.

How to Display the Date and Time Using Linux Command Line

1. Why this guide? The primary reason for writing this document is that a lot of readers feel the existing HOWTO to be too short and incomplete, while the Bash Scripting guide is too much of a reference work. There is nothing in between these two extremes.

Bash Guide for Beginners - Linux Documentation Project

Of course you could have opened your mail program to check the results; this is just to demonstrate that the script sends a decent mail with "To:", "Subject:" and "From:" header lines.. Many more examples using case statements can be found in your system's init script directory. The startup scripts use start and stop cases to run or stop system processes. A theoretical example can be found in ...

Using case statements - Linux Documentation Project

Many people know about cat command which is useful in displaying entire file content. But in some cases we have to print part of file. In today's post we will be talking about head and tail commands, which are very useful when you want to view a certain part at the beginning or at the end of a file, specially when you are sure you want to ignore the rest of the file content.
