Similar toxicities were observed in the initial patients treated with CD19 CAR T cells. In the first pediatric ALL patient treated 8, 9, it became clear that supraphysiologic cytokine elevation was responsible for the vast majority of symptoms, suggesting that these toxicities were the result of CRS. Investigators struggled with the then-accepted definition of and grading scheme for CRS.

You missed the mark a bit there. You pointed out that, "Intelligence is not equal throughout the races. Examples of this are evident in the inventiveness of a particular group, what technologies they create, the societal structure they create, their art and their sciences", a statement which in and of itself is a contradiction.
