Human physiology seeks to understand the mechanisms that work to keep the human body alive
and functioning, through scientific enquiry into the nature of mechanical, physical, and biochemical
functions of humans, their organs, and the cells of which they are composed. The principal level of
focus of physiology is at the level of organs and systems within systems.

Dense connective tissue, also called dense fibrous tissue, is a type of connective tissue with fibers
as its main matrix element. The fibers are mainly composed of type I collagen. Crowded between
the collagen fibers are rows of fibroblasts, fiber-forming cells, that generate the fibers. Dense
connective tissue forms strong, rope-like structures such as tendons and ligaments.

by Kristina Bauer Globally, aromatherapy is becoming increasingly popular. As the number of essential oil users continues to grow, and as recommendations for undiluted use increase, so exposure increases. As Robert Tisserand notes, "The number of incidents of an adverse reaction to an essential oil depends on: • Its inherent toxicity • The number of [...]"
