More than 80 diseases occur as a result of the immune system attacking the body's own organs, tissues, and cells. Some of the more common autoimmune diseases include type 1 diabetes, rheumatoid arthritis, systemic lupus erythematosus, and inflammatory bowel disease.

Diseases & Conditions | NIH: National Institute of Allergy ...

1. Introduction and The Altered Glycan Theory of Autoimmunity. Since the discovery of altered IgG glycosylation in patients with rheumatoid arthritis, there has been mounting evidence favoring the role of glycans in the pathophysiology of autoimmunity. For example, it is now well established that the type of glycan present at residue Asn-180 of IgG1 helps dictate the effector function of the ...
