Course Summary Get some extra help in science class with our Holt McDougal Earth Science: Online Textbook Help course. The fun video lessons and quizzes line up with the chapters in your textbook

**Mechanical Weathering.** Let's say you're a big rock living in a national park. For the most part, life is good as you spend your days living outside in the natural environment.

Quia Web allows users to create and share online educational activities in dozens of subjects, including Science.

Earth is the third planet from the Sun, and the only astronomical object known to harbor life. According to radiometric dating and other sources of evidence, Earth formed over 4.5 billion years ago. Earth's gravity interacts with other objects in space, especially the Sun and the Moon, Earth's only natural satellite. Earth orbits around the Sun in 365.26 days, a period known as an Earth year.

**Physical characteristics.** Mars is approximately half the diameter of Earth, with a surface area only slightly less than the total area of Earth's dry land. Mars is less dense than Earth, having about 15% of Earth's volume and 11% of Earth's mass, resulting in about 38% of Earth's surface gravity. The red-orange appearance of the Martian surface is caused by iron(III) oxide, or rust.
