Welcome to WebSpectra - This site was established to provide chemistry students with a library of spectroscopy problems. Interpretation of spectra is a technique that requires practice - this site provides ^1H NMR and ^{13}C NMR, DEPT, COSY and IR spectra of various compounds for students to interpret. Hopefully, these problems will provide a useful resource to better understand spectroscopy.

Oh, Werner von Braun had it all figured out in 1952. In six issues of Collier's magazine he laid out a plan to send men to Luna and Mars. First you build a space ferry as a surface to orbit cargo transport (which was the great-grandfather of the Space Shuttle). Then you use it to make a space station. And it was going to be a beauty of a space station, too.

Carbon-14 Dating. Carbon-14 (^{14}C), also referred to as radiocarbon, is claimed to be a reliable dating method for determining the age of fossils up to 50,000 to 60,000 years. If this claim is true, the biblical account of a young earth (about 6,000 years) is in question, since ^{14}C dates of tens of thousands of years are common. 1. When a scientist's interpretation of data does not match the ...

In previous pages in this series we looked at the theoretical aspects of the equation $E = mc^2$. We will now start to look at the practical aspects, starting with radioactive decay. The term "radioactive decay" has negative connotations; we hear about nuclear waste decaying and harmful radiation being released and so on. However, we are not only constantly surrounded by material that's ...
