Radiology is a branch of medicine that uses imaging technology to diagnose and treat disease. Radiology may be divided into two different areas, diagnostic radiology and interventional radiology.

Imaging and radiology: MedlinePlus Medical Encyclopedia

Federated Learning for Medical Imaging. Nearly 153 exabytes of healthcare-related data were generated in 2013; this number will increase by 48% annually to reach 2,314 exabytes in 2020 [1], [2], [3]. While machine learning can benefit from this "big data" to generate state-of-the-art models, most healthcare data is hard to obtain due to legal, privacy, technical, and data-ownership ...

Magnetic resonance imaging (MRI) is a medical imaging technique used in radiology to form pictures of the anatomy and the physiological processes of the body in both health and disease. MRI scanners use strong magnetic fields, magnetic field gradients, and radio waves to generate images of the organs in the body. MRI does not involve X-rays or the use of ionizing radiation, which distinguishes ...
