x Epidermal cells are positioned on the most out layer of skin and thus have the potential risk of being exposed to environmental factors. The biological effect of ionizing radiation (IR) on the skin tissue is a significant problem for medical applications, such as radiotherapy for cancer treatment.

Red Journal - Biology

Abstract. The percentage of salt in human body fluids and seawater is often used to provide evidence that life originated abiogenetically in the sea.

Is Sodium Chloride Level in Oceans Evidence for Abiogenesis?

All theistic evolutionists and many who invoke other strategies for harmonising Genesis 1-3 with the human fossil record hold to the concept of pre-Adamites, although they seldom use the term. However, throughout the human fossil record there is evidence of sin, violence, trauma, hardship, and premature physical death.

The baculum (also penis bone, penile bone, or os penis, or os priapi) is a bone found in the penis of many placental mammals. It is absent in the human penis, but present in the penises of other primates, such as the gorilla and chimpanzee. The bone is located above the male urethra, and it aids sexual reproduction by maintaining sufficient stiffness during sexual penetration.
