Fig. 1. Three formulae used by Mendel in his 1866 memoir for explaining the ratio observed of one character (, p. 30). The two parents belong to, respectively, type A and type a (for instance yellow and green peas. A is dominant over a. The first formula represents what happens during fertilization: pollen cells (pollenzellen) associate with ovarian cells (Keimzellen).

From Mendel to epigenetics: History of genetics ...

Biology is the natural science that studies life and living organisms, including their physical structure, chemical processes, molecular interactions, physiological mechanisms, development and evolution. Despite the complexity of the science, there are certain unifying concepts that consolidate it into a single, coherent field. Biology recognizes the cell as the basic unit of life, genes as ...

Introduction. The year 2003 marked the 50th anniversary of the historic characterization of DNA by James Watson and Francis Crick with an article in the journal Nature on April 25, 1953, that revealed the structure of DNA (Watson and Crick, 1953). Their discovery was the culmination of a decade of intense research following Oswald T. Avery, Colin MacLeod, and Maclyn McCarty's demonstration that ...

iPSC quality control. Since the initial generation of iPSCs in 2006, many research groups have created iPSC lines, extending to different cell types and emanating from different patient pools, including from other species, and identifying new TF combinations that increase the efficiency of iPSC production (see [] for a recent review). Further, the most common source of human iPSCs is
