Human Anatomy And Physiology 7th

The human body is the structure of a human being. It is composed of many different types of cells that together create tissues and subsequently organ systems. They ensure homeostasis and the viability of the human body. It comprises a head, neck, trunk (which includes the thorax and abdomen), arms and hands, legs and feet. The study of the human body involves anatomy, physiology, histology and ...

Human body - Wikipedia

Anatomy (Greek anatomē, "dissection") is the branch of biology concerned with the study of the structure of organisms and their parts. Anatomy is a branch of natural science which deals with the structural organization of living things. It is an old science, having its beginnings in prehistoric times. Anatomy is inherently tied to developmental biology, embryology, comparative anatomy ...

Anatomy - Wikipedia

We have been created fearfully and wonderfully by our Creator God, and the human body showcases God's intricate design. Design features are evident in the structures and functions of each of the body systems. I present a design approach to the study of human anatomy and physiology from a biblical worldview.
