Many observations concerning intelligence could be explained if much variance in intelligence reflects myelination differences. More intelligent brains show faster nerve conduction, less glucose utilization in positron emission tomography, faster reaction times, faster inspection times, faster speeds in general, greater circumference and volume, smaller standard deviation in reaction times ...

Intelligence and brain myelination: A hypothesis ...

Vaccination coverage and decline of the disease burden globally. We provide detail on three vaccinations: DTP, measles, and polio. These diseases (plus tuberculosis) were the original six targeted by the WHO for their Expanded Programme on Immunization (EPI) and mass vaccination coverage expanded greatly. The EPI was initiated by the WHO in 1974 to build on the success of smallpox eradication ...

Calculus (from Latin calculus, literally 'small pebble', used for counting and calculations, as on an abacus) is the mathematical study of continuous change, in the same way that geometry is the study of shape and algebra is the study of generalizations of arithmetic operations.. It has two major branches, differential calculus (concerning instantaneous rates of change and slopes of curves ...

1. Introduction. Water scarcity has become a global, critical issue, whereby many countries of the Middle East, South East Asia and North Africa are now classified as water-stressed regions [1]. Global water consumption has increased considerably, leading to a massive increase in the proportion of the world population living in water stressed areas from 14% in the 1900's to about 58% in the 2000 ...
