It's more or less what you craving currently. This independent versus dependent variable answer key, as one of the most vigorous sellers here will completely be in the course of the best options to review.

Independent Versus Dependent Variable Answer

Answers. Short answer: 1. Independent variable: caffeine/coffee, dependent variable: Reactions times 2. Independent variable: temperature of day (hot vs cold), dependent variable: walking speed Long answer: The independent variable is the thing that is applied. It's the thing that is manipulated. It's the cause/if.

Independent vs Dependent Variables? | Yahoo Answers

The independent variable is the one the researcher changes- the type of music in the first example. The dependent variable is the measurement of the effects, which DEPEND on what the research changed- so the time through the maze in your first example. Gypsyfish · 8 months ago 0

Independent vs Dependent Variables? | Yahoo Answers

An independent variable is the variable that is changed or controlled in a scientific experiment to test the effects on the dependent variable. A dependent variable is the variable being tested and measured in a scientific experiment. The dependent variable is 'dependent' on the independent variable.

Difference Between Independent and Dependent Variables

The correct answer is C. The type of SSRI (A) is not discussed in the question stem. The dosage of the SSRI (B) is the independent variable (remember, this is the variable being manipulated that will then impact the dependent variable). Levels of depression (C) are dependent on the dosage of the SSRI, making this the dependent variable.
