Halliburton's history of fracturing achievement is due to continuous devotion to technology development, extensive training and a global best practices process. Since Halliburton performed the first commercial fracturing treatment in 1949, over 1 million wells have been successfully fractured by the industry in the United States.

Basic Oilfield Mathematics covers general mathematical calculations that are likely to be encountered in the oilfield. The course takes a practical approach, featuring numerous examples for tubular weights and volumes, tank capacities, API gravity, downhole static pressure, and unit conversion from one unit to another.

I've only been employed in the oilfield for 3 years and currently make around \$300,000/yr and get job offers on a weekly basis. Anyone (no education or prior experience required) could hold this position within 5-10 years of working in the oilfield. I'd also be glad to answer any questions people may have about the career aspects of the oilfield.
