Immune System Yahoo Answers

an immune system is a system of fighting cells within our bodies that defend us against illnesses. When our immune systems are compromised by severe illnesses, such as AIDS, that is a virus which attacks our immune system, we can become even more ill and subseptable to other sicknesses which normally wouldnt make us as sick as they do without a healthy immune system.

What is a Immune System? | Yahoo Answers

Yahoo Answers Sign in Mail ☼ ... Your immune system is compromised by everything that is in that junk. Sugar or sugar substitutes used in that garbage causes your parietal cells in your stomach to stop utilizing HCL properly and promotes CANDIDA overgrowth. The high fructose corn syrup is not sugar and causes fatty liver to happen.

Does soda wreck your immune system? | Yahoo Answers

Some of the biggest reasons for a weakened immune system are poor diet, lack of exercise and rest, smoking, heavy drinking, stress and environmental pollutants. If you can change a few of these -- eating better for example -- you can do a lot to keep yourself healthy. That said, an good, proven, effective immune booster is a must!!

Very Weak Immune System ? | Yahoo Answers

Best Answer: The best way to boost the immune system is to practice healthy eating and living habits. As simple as this may sound, that is what it takes to get your immune system back in shape. To start with, watch your acid/alkali balance. You can add lemons or apple cider vinegar to your diet (use to make ...

immune system? | Yahoo Answers

Yahoo Malaysia Answers ... have components within their cells and on the surface of their cells which are recognised as foreign by the immune system. The 'components' that the immune system recognise are called antigens. Once an immune cell (a B cell) recognises an antigen, a cascade of reactions begins with the ultimate goal of removing ...

A question about the immune system? | Yahoo Answers

Best Answer: The immune system is a multi-tasker. This is what a lot of people don't understand when it comes to being sick and taking drugs, prescriptions, vaccinations, etc. The immune system is strong enough to fight off any sickness, whether it's the flu, common cold, or the chicken pox.

Question about the immune system? | Yahoo Answers

Yahoo 7 Answers Sign in Mail ☼ ... Answers. Best Answer: The immune system is made up of special cells and chemicals that fight infection. The white blood cells that make up the immune system are made in the bone marrow. These cells move through blood and tissue. Every time a microbe (germ) is overcome, the immune system remembers that microbe.

outline the function of the immune system.? | Yahoo Answers

Best Answer: There is no shot to boost your immune system, but if you are run down you should begin by starting a regimen of vitamins recommended by your doctor. He may want to give you a B-12 shot. You must start a balanced diet. If you are anemic, your doctor may order iron supplements for you to take ...

Immune system? | Yahoo Answers

The immune systems of vertebrates consist of many types of proteins, cells, organs, and tissues, which interact in an elaborate and dynamic network. As part of this more complex immune response, the human immune system adapts over time to recognise specific pathogens more efficiently.

what is immunity and immune system of our body? | Yahoo ...

How can I make my cat's immune system stronger? She was ill for a long time before we could even

begin vaccinations when she was small, and since has had a cold a few times, I just want to make her less prone, if possible, to getting ill? Is it possible to do that, like we do for ourselves? She is a good weight now, her eating has finally been sorted out as well ... eating Orijen, half dry and ...

Immune system boosting.....? | Yahoo Answers

The adaptive immune system is one of the two components of a vertebrate's immune system. The other component, the innate immune system, triggers the adaptive system, which targets pathogens and attempts to destroy them. What makes the adaptive immune system so valuable is its ability to remember the first and recognize any subsequent infections caused by the same pathogen.

What is the Adaptive Immune System? (with pictures)

Compromised immune system is when your body is constantly being attacked by antigens. Your immune system can only fight for so long before it loses the fight.

what is the definition of a compromised immune system ...

If your immune system didn't work, you'd be sick all the time and would be more likely to catch any number of diseases, some of which would be fatal. That is why is it so important to not visit people with weak immune systems (cancer patients, the elderly, infants) when you are sick, because their immune system won't be able to keep them from ...

What if our immune system didn't work? | Yahoo Answers

The immune system is strong enough to fight off any sickness, whether it's the flu, common cold, or the chicken pox. It's easy for the body to fight off one thing at a time because it doesn't put too much stress on the body.
