Answer Key Lab 10 Human Inheritance - Lab 10 Human... A sample of blood is combined with each specific antibody: anti-A, anti-B, anti-O or anti-rh+ antibodies. A positive reaction, usually indicated by blood coagulation, indicates the presence of that particular blood surface marker. Antigens are molecules that trigger an immune response, causing the production of antibodies specific to that antigen.

inheritance of human traits answer key - Bing

Dominant traits will be symbolized by 2 capital letters (TT) and recessive traits will be symbolized by 2 lower-cased letters (tt). This actually defines the genotype of the trait. 6). Poll the class by having the students come to the board and tally their results.

Exploring Human Traits Genetic Variation

Which traits in this investigation showed a blending of genes? What is this "blending" called? One example is that of hair type curly was dominant and straight was recessive, but there was a medium, or a blending with the heterozygous (hybrid) individual who turned out "wavy" haired. Blending is also called "incomplete dominance".

I. Title: Investigating Human Traits - "Face Lab"

Traits are controlled by factors called genes. For each trait listed in Table 1, you get one gene from your mother and one gene from your father. For each trait, there is a dominant form and a recessive form. The dominant gene masks the effect of the recessive gene for the trait.
