One crucial result of the standardization work is that prices of standard based solutions are lowered! A good proof of this expectation is the announced price reduction of IEC 61850 based communication for SEL protection and control IEDs: SEL reduced the price for the IEC 61850 option by 60 (SIXTY!) percent!!

IEC 61850 is an international standard defining communication protocols for intelligent electronic devices at electrical substations. It is a part of the International Electrotechnical Commission's (IEC) Technical Committee 57 reference architecture for electric power systems. The abstract data models defined in IEC 61850 can be mapped to a number of protocols.
