As an important side note, High-Fructose Corn Syrup (HFCS, which is in everything these days) is our food industry's way to mimic table sugar (sucrose) for a lower price. Most HFCS in soft drinks is 55% fructose and 42% glucose, and HFCS in pretty much everything else is 42% fructose and 53% glucose.

Biology is the "science of life." It is the study of living and once-living things, from submicroscopic structures in single-celled organisms to entire ecosystems with billions of interacting organisms; it further ranges in time focus from a single metabolic reaction inside a cell to the life history of one individual and on to the course of many species over eons of time.
