Industrial Revolution Chapter Test Form

The Industrial Revolution, now also known as the First Industrial Revolution, was the transition to new manufacturing processes in Europe and the US, in the period from about 1760 to sometime between 1820 and 1840. This transition included going from hand production methods to machines, new chemical manufacturing and iron production processes, the increasing use of steam power and water power ...

These requirements continue to increase as technology advances. In some instances, it is becoming difficult for corporations to meet these challenges, especially when timescales are so long, capital invested in research and development phases so great, and the tasks being attempted so complex that it is not known whether solutions can be found, that projects become extremely risky.
