So if I go back to the black box, we're going to write our function a little more formally now as $y=f(x)$. The inputs to our black box are now the x values that make up the domain, and the output ...

What is a Function: Basics and Key Terms - Study.com

When all the forces that act upon an object are balanced, then the object is said to be in a state of equilibrium. The forces are considered to be balanced if the rightward forces are balanced by the leftward forces and the upward forces are balanced by the downward forces. This however does not necessarily mean that all the forces are equal to each other.
