The history of chemistry represents a time span from ancient history to the present. By 1000 BC, civilizations used technologies that would eventually form the basis of the various branches of chemistry. Examples include extracting metals from ores, making pottery and glazes, fermenting beer and wine, extracting chemicals from plants for medicine and perfume, rendering fat into soap, making ...

@Irene: I think the linked definition is misleading, if not actually incorrect. In the example, the sense of "purpose" arises from the word "so", not the word "may" (which as JLG says, can only imply "possibility"). In OP's context, may is a formal choice implying some degree of deferential hesitancy, along the lines of may it please you to find, or you will be able to find.
