A season is a division of the year marked by changes in weather, ecology, and amount of daylight. On Earth, seasons result from Earth's orbit around the Sun and Earth's axial tilt relative to the ecliptic plane. In temperate and polar regions, the seasons are marked by changes in the intensity of sunlight that reaches the Earth's surface, variations of which may cause animals to undergo ...

I've come to realize, however, that this quotation doesn't capture the complete definition of meaningful work. I would delete one word and change one conjunction: Education is the filling of a bucket and the lighting of a fire. Truly meaningful work both gives students new knowledge and draws on the wisdom students already possess.

The topography or surface area of the world's continents varies greatly, with features ranging from mountains and other highland areas to plunging canyons and low-lying basins. Despite this diversity of landforms, certain large-scale features are common to all continents. Generally, the continents contain vast interior plains that make up over 50 percent of their landscape.
