The Institute of Medicine study Crossing the Quality Chasm (2001) recommended that an interdisciplinary summit be held to further reform of health professions education in order to enhance quality and patient safety. Health Professions Education: A Bridge to Quality is the follow up to that summit, held in June 2002, where 150 participants across disciplines and occupations developed ideas ...

Health Professions Education: A Bridge to Quality

When using CFA, the use of model fit indices is an inherent part of testing how well the data represents theory-driven assumptions. In the sample, a variety of methods were used, typically a combination of three selected indices (see Table 2). The problematic part was the justifications for usage, varying cut-off points of acceptance, and decisions made for good fit.
