Biosphere 2 is an American Earth system science research facility located in Oracle, Arizona. It was originally constructed between 1987 and 1991, and has been owned by the University of Arizona since 2011. Its mission is to serve as a center for research, outreach, teaching, and lifelong learning about Earth, its living systems, and its place in the universe.

There are many types of cells. In biology class, you will usually work with plant-like cells and animal-like cells. We say "animal-like" because an animal type of cell could be anything from a tiny microorganism to a nerve cell in your brain. Biology classes often take out a microscope and look at single-celled microbes from pond water.

### **Biology4Kids.com: Cell Structure**

The CO<sub>2</sub> that nature emits (from the ocean and vegetation) is balanced by natural absorptions (again by the ocean and vegetation). Therefore human emissions upset the natural balance, rising CO<sub>2</sub> to levels not seen in at least 800,000 years. In fact, human emit 26 gigatonnes of CO<sub>2</sub> per year while CO<sub>2</sub> in the atmosphere is rising by only 15 gigatonnes per year - much of human CO<sub>2</sub> emissions is ...

### **How do human CO2 emissions compare to natural CO2 emissions?**

This film describes natural selection and adaptation in populations of rock pocket mice living in the American Southwest. Mice living on light-colored sand tend to have light-colored coats, while mice living on patches of dark-colored rock have mostly dark-colored coats. Dr. Michael Nachman studies ...
