Jean Baptiste de Lamarck - types of organisms change over time & new types of organisms are modified descendants of older types. To explain how species change, Lamarck incorrectly hypothesized that traits were acquired through an organism's experience or behavior and were passed on to its offspring.

Biology Chapter 16 Section 1 - quia.com

Early scientists proposed ideas about evolution. Evolution is the process of biological change by which descendants* come to differ from their ancestors. Much of today's understanding of evolution is based on Charles Darwin's work in the 1800s. But Darwin did not come up with the idea of evolution himself.

Holt McDougal Biology, Author: Stephen Nowicki - StudyBlue

Evolution is the process of biological change by which descendants come to differ from their ancestors. This concept had been discussed for more than 100 years when Darwin proposed his theory of the way evolution works. Today, evolution is a central theme in all fields of biology. The 1700s were a time of great advances in intellectual thought.
