In common usage, the word "human" generally refers to the only extant species of the genus *Homo*—anatomically and behaviorally modern *Homo sapiens*. In scientific terms, the meanings of "hominid" and "hominin" have changed during the recent decades with advances in the discovery and study of the fossil ancestors of modern humans. The previously clear boundary between humans and apes has ...

Human - Wikipedia

Intersex people are individuals born with any of several variations in sex characteristics including chromosomes, gonads, sex hormones, or genitals that, according to the UN Office of the High Commissioner for Human Rights, "do not fit the typical definitions for male or female bodies". Such variations may involve genital ambiguity, and combinations of chromosomal genotype and sexual phenotype ...

The Student's t-test is a statistical test that compares the mean and standard deviation of two samples to see if there is a significant difference between them. In an experiment, a t-test might be used to calculate whether or not differences seen between the control and each experimental group are a factor of the manipulated variable or simply the result of chance.

In biological terms, a human being, or human, is any member of the mammalian species *Homo sapiens*, a group of ground-dwelling, tailless primates that are distributed worldwide and are characterized by bipedalism and the capacity for speech and language, with an erect body carriage that frees the hands for manipulating objects. Humans share with other primates the characteristics of opposing ...

Human being - New World Encyclopedia

Cells as Interactome Networks. Systems biology can be said to have originated more than half a century ago, when a few pioneers initially formulated a theoretical framework according to which multiscale dynamic complex systems formed by interacting macromolecules could underlie cellular behavior (Vidal, 2009). These theoretical systems biology ideas were elaborated upon at a time when there was ...
