This course focuses on the hydraulic principles of centrifugal pumps, as well as the interaction between a pump and a pipeline. It covers a brief review of fluid mechanics, the modified Bernoulli equation applied to piping systems, the energy equation applied to pumps and piping systems, energy loss in a pipeline and in fittings. Class discussion also includes pump selection process, pump ...

Pipelines move fluids by pumps under steady state conditions. However, when the flow becomes unsteady – for example, when a downstream valve in a pipeline is closed rapidly – the result can be catastrophic. Changes in the flow direction can create pressure surges producing stress in the pipe wall and a loud banging noise called, water hammer.

The Kerr metric or Kerr geometry describes the geometry of empty spacetime around a rotating uncharged axially-symmetric black hole with a quasispherical event horizon. The Kerr metric is an exact solution of the Einstein field equations of general relativity; these equations are highly non-linear, which makes exact solutions very difficult to find.
