PRINCE GEORGE'S COMMUNITY COLLEGE

The Human Biology, Ecology and Evolution Program is interested in the relationships between culture, behavior, and environment and their impacts on health and well-being. This focus is crucial in light of accelerating ecological, economic and socio-political changes such as globalization, market integration and climate change.

Human Biology, Ecology, and Evolution | Department of ...

Ecology is the study of the interactions of organisms and their environments. The methods of ecology fall roughly into three categories: descriptive surveys of patterns of species and resource distribution and abundance, theoretical modeling, and experimental manipulations. Ecological systems are "open" systems, and patterns and processes are products of a huge number of interacting forces.
