How to Calculate the Results From a Spirometer Lab. Spirometry, the measurement of volumes of air moving into and out of the respiratory system, helps doctors detect and treat respiratory diseases. A spirometer contains a mouthpiece attached to a volume indicator or airflow transducer; advanced models produce a graphical spirogram. You can calculate respiratory volumes, capacities (the sum of ...

The ankle, or the talocrural region, is the region where the foot and the leg meet. The ankle includes three joints: the ankle joint proper or talocrural joint, the subtalar joint, and the inferior tibiofibular joint. The movements produced at this joint are dorsiflexion and plantarflexion of the foot. In common usage, the term ankle refers exclusively to the ankle region.
