E. How many minutes are needed to reach the maximum temperature from the boiling point? 8. What is the total time, in minutes, from beginning of melting to the end of boiling? 9. What phase is the substance at 50°C? I know that I asked for a lot, but you don't have to answer it, as long as you show me how because I'm totally stuck.

**Can someone help me with my heating curve project on ...**

The heating curve shown above is a plot of temperature vs time. It represents the heating of substance X at a constant rate of heat transfer. Answer the following questions using this heating curve: \_\_\_\_1. In what part of the curve would substance X have a definite shape and definite volume? \_\_\_\_2.

In this lab, students will create a phase change graph by adding and removing heat to observe and record data during actual phase changes. Instead of just memorizing a heating/cooling curve they see in a textbook, students create their own. Grade Level. High school. Objectives. By the end of this lesson, students will
