Java Dependency Injection design pattern allows us to remove the hard-coded dependencies and make our application loosely coupled, extendable and maintainable. We can implement dependency injection in java to move the dependency resolution from compile-time to runtime.

Java Dependency Injection - DI Design Pattern Example ...

In computer programming, a string is traditionally a sequence of characters, either as a literal constant or as some kind of variable. The latter may allow its elements to be mutated and the length changed, or it may be fixed (after creation). A string is generally considered as a data type and is often implemented as an array data structure of bytes (or words) that stores a sequence of ...

String (computer science) - Wikipedia

6) Explain what is logistic regression? Logistic regression is a statistical method for examining a dataset in which there are one or more independent variables that defines an outcome.
