Competition is an interaction between organisms or species in which both the organisms or species are harmed. Limited supply of at least one resource (such as food, water, and territory) used by both can be a factor. Competition both within and between species is an important topic in ecology, especially community ecology. Competition is one of many interacting biotic and abiotic factors that ...

According to Sternberg, a complete explanation of intelligence entails the interaction of these three subtheories. The componential subtheory specifies the potential set of mental processes that underlies behavior (i.e., how the behavior is generated) while the contextual subtheory relates intelligence to the external world in terms of what behaviors are intelligent and where.

Indirect Reference and the Creation of Distance in History. EUGEN ZELENÁK. History and Theory, Theme Issue 50 (December 2011), 68-80. In his discussion of David Hume and historical distance, Mark Salber Phillips points out that in the process of distance-creation there is a distinction between something occurring "within the text" and "outside the text."
