Large-signal modelling Shockley diode model. The Shockley diode equation relates the diode current of a p-n junction diode to the diode voltage. This relationship is the diode I-V characteristic: $I = I_s (e^{V/V_T} - 1)$, where I_s is the saturation current or scale current of the diode (the magnitude of the current that flows for negative in excess of a few V_T , typically 10 –12 A).
