Biology is the natural science that studies life and living organisms, including their physical structure, chemical processes, molecular interactions, physiological mechanisms, development and evolution. Despite the complexity of the science, there are certain unifying concepts that consolidate it into a single, coherent field. Biology recognizes the cell as the basic unit of life, genes as ...

Biology - Wikipedia

Biological organization is the hierarchy of complex biological structures and systems that define life using a reductionistic approach. The traditional hierarchy, as detailed below, extends from atoms to biospheres. The higher levels of this scheme are often referred to as an ecological organization concept, or as the field, hierarchical ecology.. Each level in the hierarchy represents an ...

Radical behaviorism was founded by B.F Skinner and agreed with the assumption of methodological behaviorism that the goal of psychology should be to predict and control behavior.. Skinner, like Watson, also recognized the role of internal mental events, and while he agreed such private events could not be used to explain behavior, he proposed they should be explained in the analysis of behavior.

Basically there are three common views of origins: 1. Creation - the belief that living things were created by God in a short period of time in the relatively recent past.. 2. Organic evolution - the belief that man evolved from lower animals, which had themselves developed from simpler animals, over millions of years, entirely by natural processes (without God).

Creation as Evidence for God, Jesus and the Bible

Which viewpoint is best supported by the evidence? Did life begin without a Creator or did God create it? Evidence that life never comes from non-living materials is so abundant that it is a basic principle of science called the Principle of Biogenesis (living things come only from living things).
