K-PS2 Motion and Stability: Forces and Interactions *The performance expectations marked with an asterisk integrate traditional science content with engineering through a Practice or Disciplinary Core Idea.

DCI Arrangements of the Next Generation Science Standards

The repulsive energy goes up as $(d_i / R)^{12}$, where R is the distance between the atoms and d_i is the distance threshold below which the energy becomes repulsive. d_i depends on the types of atoms. The large exponent means that when $R < d_i$ then small decreases in R cause large increases in repulsion. Short range repulsion only matters when atoms are in very close proximity ($R < d_i$), but at ...

Ecology; Ecology addresses the full scale of life, from tiny bacteria to processes that span the entire planet. Ecologists study many diverse and complex relations among species, such as predation and pollination. The diversity of life is organized into different habitats, from terrestrial (middle) to aquatic ecosystems.

Ecology - Wikipedia

In this lesson, students learn about organism interactions and how those interactions shift in response to climate change, especially in grassland communities.

Simulating Climate Change Research in Grasslands - Science ...

Recently, several studies have been conducted to characterize the presence of microplastics in the Great Lakes. Plastics with diameters <5 mm were collected from sediments and beaches in Lake Ontario, in the Humber Bay region which receives inputs from Toronto via the Humber River (Corcoran et al., 2015). Over 4000 plastic pellets were collected during three sampling events in 2013, and these ...
