The evolution of morality refers to the emergence of human moral behavior over the course of human evolution. Morality can be defined as a system of ideas about right and wrong conduct. In everyday life, morality is typically associated with human behavior, and not much thought is given to the social conducts of other creatures. The emerging fields of evolutionary biology and in particular ...

Evolution of morality - Wikipedia

The timeline of human evolution outlines the major events in the development of the human species, *Homo sapiens*, and the evolution of the human's ancestors. It includes brief explanations of some of the species, genera, and the higher ranks of taxa that are seen today as possible ancestors of modern humans.. This timeline is based on studies from anthropology, paleontology, developmental ...

Indirect Reference and the Creation of Distance in History. EUGEN ZELENÁK. History and Theory, Theme Issue 50 (December 2011), 68-80. In his discussion of David Hume and historical distance, Mark Salber Phillips points out that in the process of distance-creation there is a distinction between something occurring "within the text" and "outside the text."

Volume 46-50: Abstracts - History and Theory

This paper summarizes recent evidence on what achievement tests measure; how achievement tests relate to other measures of "cognitive ability" like IQ and grades; the important skills that achievement tests miss or mismeasure, and how much these skills matter in life.
