Psychology is the science of behavior and mind (not to be confused with neuroscience, which studies the neural underpinnings of psychological phenomena ex. neural circuits). Psychology includes the study of conscious and unconscious phenomena, as well as feeling and thought. It is an academic discipline of immense scope. Psychologists seek an understanding of the emergent properties of brains ...

Dog behavior is the internally coordinated responses of individuals or groups of domestic dogs to internal and external stimuli. It has been shaped by millennia of contact with humans and their lifestyles. As a result of this physical and social evolution, dogs, more than any other species, have acquired the ability to understand and communicate with humans and they are uniquely attuned to ...

Dog behavior - Wikipedia

There's a good reason so many people (mostly the sugar-burners, whose disparate group includes fruitarians, veg*ans, HEDers, body-builders, most MDs, the USDA and virtually every RD program in the country) can't seem to grasp why a lower carb, Primal approach to eating is a better choice for health and fitness: their fundamental paradigm - the core theory that underpins everything else ...

Why Fat, Not Carbs, Are the Preferred Fuel for the Human Body

ABSTRACT This article synthesizes knowledge on the role of relationships and key macro and micro-contexts - poverty, racism, families, communities, schools, and peers - in supporting and/or undermining the healthy development of children and youth, using a relational developmental systems framework. Relationships with parents, siblings, peers, caregivers, and teachers are explored in the context ...

Drivers of human development: How relationships and ...

A new study finds that the choice to eat or omit a meal before an early workout could affect our relationship to food for the rest of the day.

The applications of modern artificial intelligence (AI) algorithms within the field of aging research offer tremendous opportunities. Aging is an almost universal unifying feature possessed by all living organisms, tissues, and cells.

Artificial intelligence for aging and longevity research ...

The book claims ages of 211, 225, 231 and 192 for the above. This is because of the assumption of LM being mature. It's very clear you can come up with almost any age with this method, since maturation time is not known.

The Neanderthal theory of autism, Asperger and ADHD

The voyage is expected to take about 35 days. Final preparations are underway for a 12-meter-long ship to set sail from Canada and attempt the world's first transatlantic crossing without a crew. The USV Maxlimer, an unmanned surface vessel, is bound for the south coast of England and will conduct deep sea surveys on the way, guided by a skipper in a control station in Britain.

The glossary that follows assumes a definition of ecology--the study of interactions between organisms and their environment--much wider than what fits under the field's habitual statistical persona. Ecofeminism and ecopsychology are mentioned, for example, as are terms from organic gardening and permaculture.
