Chapter 10 - Data Analysis & Probability - Duberstein

What is the experimental probability that Pam will NOT hit the bull's eye on her next throw? So far this year Trisha's softball team has played 4 of their 20 games on Field A. 5. What is the experimental probability that they will play their next game on Field A? 6. What is the experimental probability that they will play their next

LESSON Practice B 11-2 Experimental Probability

Now, this is within the realm of possibility if the true probability of picking a magenta is $\frac{1}{2}$, but it's very unlikely that you would've gotten this result with this many experiments, this many trials if the true probability was $\frac{1}{2}$. Here your experimental probability is showing, look, out of 10,000 trials, experimental probability here is ...

What is the probability that a vehicle will turn north or go straight through the intersection? $\frac{76}{380} = 0.2$ 0.75 c. What is the probability that a vehicle will not turn north? $1 - 0.125 = 0.875$ 3. Does this represent theoretical or experimental probability? Explain. Experimental; possible answer: the probabilities are based on actual data.
