How do fossils show evidence of change in the climate ...

Fossils Showing Changes in Climate. Likely, you'd expect to find the ferns in a hot climate and the pine needles in a cooler region. As such, this is probably a pretty good indication that there was some significant level of climate change to allow for this to happen. Remember, the deeper you go in the rock, the older the fossils and rocks.

Using Fossil Evidence to Evaluate Changes in Environment ...

Best Answer: Fish bones in the middle of a desert attest to changes in sea level, not necessary climate (except of course locally). Climate didn't change very much in the Mesozoic but sea level fluctuated considerably. The best evidence of climate change are fossils of thermophilic organisms at much higher latitudes than they're currently found.
