Biology is the natural science that studies life and living organisms, including their physical structure, chemical processes, molecular interactions, physiological mechanisms, development and evolution. Despite the complexity of the science, there are certain unifying concepts that consolidate it into a single, coherent field. Biology recognizes the cell as the basic unit of life, genes as ...

Positive feedback is a process that occurs in a feedback loop in which the effects of a small disturbance on a system include an increase in the magnitude of the perturbation. That is, A produces more of B which in turn produces more of A. In contrast, a system in which the results of a change act to reduce or counteract it has negative feedback. Both concepts play an important role in science ...

Thank you for supporting this site! When I started doing research for a novel I am working on, I started keeping notes on books that help me better understand the human brain and human behavior.

Books about the brain, brain anatomy, evolution, and the ...

Communication applications and technologies changed dramatically over the 20th century. The telephone did not become a routine means of communication in the United States until World War I (Mandl, Kohane, and Brandt, 1998). In the early years of its use, there was concern that the telephone might harm doctor-patient relationships.
