Delayed rotator cuff repair surgery may result in more instances of revision surgery compared to earlier repair, according to Michael Fu, MD, MHS, an orthopaedic surgery resident at the Hospital for Special Surgery in New York, who will present the data today.

**Delayed Rotator Cuff Repair Increases Revision Risk**

Patients often report moderate pain after total hip arthroplasty (THA), and multimodal analgesia has gained popularity for the treatment of such pain. Acetaminophen is a common nonopioid that is administered as part of multimodal treatment. However, a double-blind, controlled trial found that intravenous (IV) acetaminophen did not result in a significant difference in pain scores, opioid ...
